Comet DAC

0000

The EXOGAL Comet is a high performance digital to analog audio converter (DAC). Connect your computer, or other digital/ analog source, and experience exceptional audiophile quality sound. The Comet DAC does everything you would expect a high-end DAC to do, including balanced and unbalanced analog outputs, digital volume control and asynchronous USB input. Audio signals are processed using EXOGAL up-sampling and filtering technology. The USB input can accept up to 32-bit/384kHz PCM data rates, DSD64, and DSD 128 in DOP (DSD over PCM) format.
